In your opinion what was positive about the way in which the lecturer handled the course?

9 have answered this question

— the lecturer was very organized and was the most helpful and encouraging teacher I've ever had. By far the most interesting course and the best lecturer I've had.

— Excellent well resumed slides; Simple explanations

— He did the best he could at the short time he had.

— He made it very interesting with good examples, he made it very easy to understand

— During the circumstances in the way he had to jump in and take over when half of the course already was suppose to be covered he did a really great job.

— dont know

— He did the best he could under restricted time.

— Kondrad did a very good job, specially considering the circumstances.

— motivation

— more specific on what to study on for the exam.

— I was at first very dissappointed at how the institution handled the situation when Anne got sick. A big institution should ALWAYS have a reserve plan. The institution should also think about who will handle the Minor Fields Studies information. Some of us wanted to apply for MFS but couldnt since no info was available when Anne, who was responsible got sick. And other people at the instutution didn't have relevant informtion.

— ?

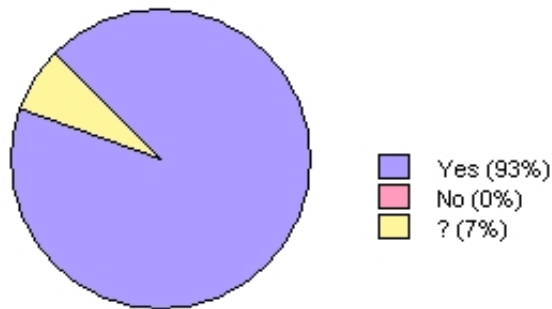

— eftersom det blev strul med kursen då Anna blev sjuk så tyckte jag det löstes bra trots förutsättningarna. Annars hade jag hoppas på mer fokus på gener frågan. Men det fanns ju i Annas föreläsningar men då klassen fick välja vad det skulle fokuseras på så föll det tyvärr bort... men det kan ju inte ni rå för!

— Harder course. More mathematical models and empirical studies analyzed. Deeper insight on development issues

Yes (9 comments)

- easy
- Relevant questions. Maybe too many, could be one less. But overall good questions.
- The exam was good
- It was a good exam since the questions were expected but still not too easy
- Ok, but had a question that weren't really covered by the lecturer on the course - which is unfair!
- The exam covered the course and the lectures and made room for the different grades.
- Mycket bra tenta! En av de bästa jag haft, alltså frågorna! Det är precis så som tentafrågor ska vara! Har man läst litteraturen kunde man absolut svara på dem, men de var inte för lätta. Hade man inte läst det mesta så var man körd. Och det som var bra att det var resonemangsfrågor, om samband och sammanhang vilket är det viktiga i dessa sammanhang! Det var bra att det inte var begreppsfrågor- typ vad betyder det här, för när det är så mycket litteratur så är det omöjligt att komma ihåg alla begrepp. Jag vill ge Konrad en stor guldstjärna för tentan. På riktigt, den var väldigt bra!
- Very good exam, covered all we've been talking about. I liked that we could choose 2 of the 3 questions in section B.
- Didn't have enough time to answer the 2 last essay questions.

Are you satisfied with the administrative routines around the exam? (our sign-up routines, exam supervisors' (tentavakternas) performance etc)?

- Teacher was of great guidance and helpful both during and outside the classes
- The institution should also think about who will handle the Minor Fields Studies information. Some of us wanted to apply for MFS but couldnt since no info was available when Anne, who was responsible got sick. And other people at the instutution didn't have relevant informtion.
- It was a great fun course,
- bra och viktig kurs! Ha alltid kvar den!
- Letting the class chose a few of the topics was a good idea as it increased interest in what was being studied.
- The course was not that good, though it was no ones fault that it ended up as it did. Konrad did as best as he could on the short time he had. But someone could have told the students before the first lecture with Konrad that this ment a new course not the one Anne had skissed out. Not fare to Konrad nor to the students!!
- no, more teachers at SU should be like this
