I think its nice to have a book for a course and not only articles and it would have been good if the articles was provided more easily, it took time to look around on internet for all articles to find the full version.

I would prefer having no pauses and instead start the lecture later or end it earlier.

Perhaps at the end of each section provide students with a set of questions where they can try and figure out the answers to, to help retain information and so students can better understand what to have got out from the lecture. Shouldn't be seen as an assignment, but rather as an optional task. Answers could be posted by the professor before the lecture of the next section. I find that having questions in advance can help relate to the material more and keep me engaged throughout the lecture. Maybe also have an essay as an assignment so not all the weight of the grade is on the final exam?

Overall, a good course.

Please go more into detail regarding the models we were discussing.

Great course Konrad!

I personally don't like the fact that the exam covers stuff that where on the papers that wasn't brought up on the lecture because the papers brought up a lot of unnecessary stuff and they where really hard to understand. I do see the point of them and the fact that this is university and it is suppose to be hard, but i think that you should be able to cover everything we need to know in the lectures so that even if we didn't understand the papers fully we still had a chance to understand when it was brought up in the lectures. I also would like to have all the lecture notes long before the day before the actual lectre.
