# Problem Set #5

## Exercises

For the fifth class please prepare the following problems:

- Chapter 7, computer exercise 7.6

- Chapter 13, problems 13.4, 13.6, computer exercises 13.2

- Chapter 14, computer exercises 14.2, 14.4, 14.8

The data has been sent by email.

Those exercises focus on program evaluation problems and show how the difference-in-difference approach and other panel-data methods can be useful. If you'd like me to talk about a specific exercise, please let me know.

## Hand-In Time & Place

This week you will again have to hand in the problem set before class. Please leave it in my pigeon hole (Konrad Burchardi) in S600 before 12:00 on Wednesday.
